## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claims 1-4, drawn to a process for the manufacture of financial data using endogenous variables of a financial security and for estimating change in the security's price given change in its yield with respect to time, classified in Class 705, subclass 36.

Group II, Claims 5-9, drawn to an article of manufacture, a financial security, a replicated primary security, in which calibrated measures of individual primary financial securities are combined to replicate cash flows, price or sensitivities of a single individual primary financial security, classified in Class 705, subclass 36.

Group III, Claims 10-11, drawn to a method and process for the analysis of default risk in insured commercial depository banks on a consolidated industry basis and on a case by case basis, classified in Class 705, subclass 35.

Group IV, Claim 12, drawn to a modified martingale conditional probability lattice for the valuation of multi-state theta variable and lognormal, financial security with a probability of any occurrence such as default or loss and for the valuation of callable investment securities, classified in Class 705, subclass 35.

2. The inventions as grouped above are distinct inventions. The four inventions are useable apart from each other and do not require one for the other to operate or to be useable. For example, the limitations of Group I does not require the engineering of a replicant financial security as matching the cash flows of a target security or a target primary security of Group II.
3. Because the inventions are distinct for the reasons given above and the search required for one group is not required for the other Groups, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
